

Windows 10 File Explorer

File Explorer is a tool used to browse, view, and manage files and folders on your computer. It is used to access files and folders on your computer, such as Downloads, Documents, Pictures, Music, and OneDrive.

There are two ways to open File Explorer:

1. Click on the taskbar icon. To do this, press the Windows logo key + E.

2. Access it from the Start menu. To do this, press the Windows logo key + X, then press the letter S.
